THETA 2016

INFORMATICA

CRAZY CODERS

Event details:

Event consists of four rounds.

1. INTRO: First round will be a written round. The round consists of questions on C/C++ and computers.

2. DE-CODE: Second round is technical debugging. The contestant needs to understand the program and find the errors and rectify them.

3. REVERSE CODE: Third round is technical round. In this round the contestant will be provided with the "**output of a program and a part logic of program**". The contestant needs to analyze the logic and should code the program in reverse.

4. DOUBLE CODE: Final round consists of problem solving. The contestants will be provided with a problem he has to solve the problem (eg: maze problems).

*NOTE***:** Maximum of 2 members per team.
